Winning**

The Scary Bit

90% of the UK population (over the age of 9) is deficient in selenium (an important antioxidant).

Selenium is vital for your immune system to function properly. Without enough selenium our body's ability to fight illness and infection is greatly reduced and recovery from illness will take longer.

NEMi Milk is naturally enriched with selenium which will enable your immune system to perform at optimum levels for whatever life decides to throw at you.

For any enquiries regarding NEMi Milk please call Ashleigh our National Brand Manager on 07890680756
